Thread your yarn
 Thread your yarn through the eye of the needle and make sure to tie a knot in the end of the yarn that is closest to the needle.

Start sewing
 Find the hole that is marked (1) and then flip your piece of paper over to the back, thread your needle through this hole and gently pull the yarn through until only 5cm remains on the underside.

Sew lines between the stars.
 Following the number sequence, sew between the stars to form a straight line of yarn over each of the dotted lines to connect the stars together. Make sure that on each even numbered hole you are threading the needle from the top side of the card (where your constellation is) down to the underside (back) of the card.

Cut and tie a knot in each end of your piece of yarn on the back of the card.
 Flip your piece of card over to tie the knots so that you can't see them. Make sure the knots are big enough so that they don't slip through holes.

) .%0%)!)1/!1) + *6 You are Finished! Try to see if you can find this constellation in the night sky.
