

# Make a butterfly

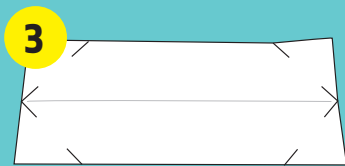

You'll need two pieces of paper cut to 15cm x 8cm and a pipe cleaner or ribbon for this design.

**Step 1:** First colour your pieces of paper in with a pattern or picture. This will decorate your butterfly's wings!

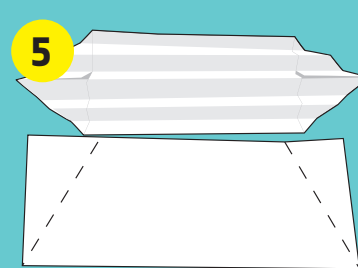

**Step 2:** Fold first piece of paper in half lengthwise, then unfold again.

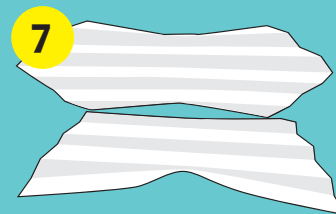

**Step 3:** Fold the corners in to meet the centre-line.

**Step 4:** Fold back and forth like an accordion, until it looks like this. The precise number of folds doesn't matter.

**Step 5:** Place your second piece of paper below the first, fold in the corners along the dotted lines. This will make the widths of the top and bottom of the pieces of paper the same length at the place where they adjoin.

**Step 7:** Place the two pieces of paper next to each other like this.

**Step 6:** Accordion-fold the bottom piece of paper until it looks like this. As in step 4, the precise number of folds doesn't matter.

**Step 8:** Use a pipe cleaner or ribbon to attach the two pieces together and form 'antennae'. **Well done, you've finished!**
