

Awesome Aotearoa

Discover why NZ species are so unique

Learning Outcomes

- ✓ Describe the processes that formed New Zealand ecology
- ✓ Explain how the unique features of New Zealand endemic species are linked
- ✓ Recognise that these features are a result of evolutionary processes

Session Outline:

What has shaped New Zealand's biodiversity? Through telling the story of our geological and biological past, this programme will provide examples of patterns of evolution in New Zealand.

Auckland Zoo Conservation Actions: Protect what's precious; Get involved
